

■ IPC2U: flexible Mini-ITX board with wide temperature range

IPC2U presents the Mini-ITX board KINO-PV-D4253/ D5253. The board can be equipped with high-powered and at the same time power-saving Intel Atom D525 Dual Core 1.8GHz CPU or alternatively with a favourable Intel Atom D425 Single Core CPU. The KINO board can be also upgraded with 4GB DDR3 RAM. The embedded board is well-suitable for different compact applications, requiring comparatively high performance with low-power consumption and at the same time a lot of interfaces.
